

CONTROLLED DOMESTIC VENTILATION QUESTIONNAIRE REGARDING SYSTEM ENGINEERING AND SYSTEM DESIGN

Please complete the following fields on your PC. Print out and **sign** the questionnaire and then send it to the relevant sales outlet.

1. Project data

Sender		Intended build	
Sales partner	_____	Building owner / Project	_____
Cust. no. / Completed by	_____	Contact	_____
Company	_____	Telephone / Mobile	_____
Contact	_____	Fax / Email	_____
Telephone / Mobile	_____	Street, no. (place of construction)	_____
Fax / Email	_____	Postal code (place of construction)	_____
Street, no.	_____	Country	_____
Postal code, town	_____	Comments on intended build	_____
Country	_____		

Important information:

- » Please ensure that the building plans, cross-sections and views needed for engineering the ventilation system are supplied and fully dimensioned.
- » If possible, please identify on the building floor plans the rooms for supply and extract air that are to be incorporated in the ventilation concept.
- » Have the positions of any ventilation risers been determined in the building plan? If not, Stiebel Eltron will plan the optimal arrangement.

2. Building details

Building type	
Detached house	Apartment building
Living space or available area (in m²):	Residential units:
Number of occupants:	
New build	Older building pre-1995, new windows
Older building post-1995	Older building pre-1995, fully modernised
Older building pre-1995, unmodernised	
Exposed position, > 4 m distance to neighbouring buildings	Sheltered position, < 1.4 m distance to neighbouring buildings
Normal position, 1.5 - 4 m distance to neighbouring buildings	
No stove	Stove with fresh air supply (balanced flue)
Stove without fresh air supply (open flue)	
Standard heat load to DIN EN 12831 in kW	Heat load calculation by Stiebel Eltron required

Please complete, sign and send to us the HEAT LOAD questionnaire.

3. Selecting the system

Appliance type
Appliance designation _____

3.1 Appliance function

Supply air routing (you do not need to complete this section if you have specified the appliance type)

Centralised via pipework _____ Decentralised via external wall valves _____

System functions of ventilation appliance (you do not need to complete this section if you have specified the appliance type)

Room heating _____ Solar backup _____

DHW heating _____ Cooling of the building _____

CONTROLLED DOMESTIC VENTILATION QUESTIONNAIRE REGARDING SYSTEM ENGINEERING AND SYSTEM DESIGN

3.2 Installation location of the appliance

Installation location of the appliance	
Cellar	Attic
Utility room	Other:
Exhaust air routing	
Through the roof skin	Through the exterior wall
External air routing	
Through the roof skin	Via on-site geothermal heat exchanger
Through the exterior wall	Other:
Selection of supply air valves (for decentralised supply air)	
Exterior wall valves, sound-insulated, Ø 162 mm core hole	Exterior wall valves, non-sound-insulated, Ø 102 mm core hole

3.3 Type of routing and material of the supply and extract air system

	Basement				Ground floor				First floor				Attic			
	LVE	LVS	WFR	LFK	LVE	LVS	WFR	LFK	LVE	LVS	WFR	LFK	LVE	LVS	WFR	LFK
In the long pane of the roof																
Inside the wood joist ceiling																
Below ceilings																
In a suspended ceiling																
In the attic area																
In the internal walls																
In the concrete ceiling (encased)																
In the filigree ceiling																
In the floor structure																
In the floor structure of the storey above																

LVE = flexible air distribution system, screed installation; LVS = flexible air distribution system, concrete installation; WFR = folded spiral-seam tube; LFK = flat duct system

Further details

3.4 Printing and sending the engineering questionnaire

Printing the engineering questionnaire

Printing

Print out and sign your questionnaire and then send it to the relevant sales outlet.

Further construction documents

The more detailed and accurate the description of your system or building, the more precisely we can plan your project. If you have any further technical drawings, photographs and specifications for the building, please send us a complete set.

Legal note

You confirm that the details are complete and correct. We use them as a basis for the design and calculation of your system. We accept no liability for calculations or designs based on incorrect, inaccurate or incomplete details. We accept no liability nor offer any warranty if our design is used for the creation of a system using third party components.
